

## Delivery of Sprint – 3

Date	10 November 2022
Team ID	PNT2022TMID22555
Project Name	Smart Waste Management System for Metropolitan Cities

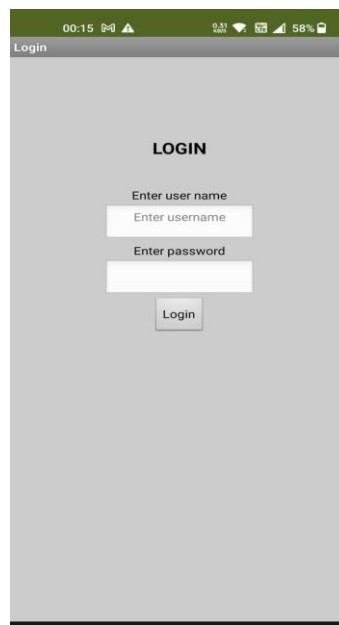

**Functional Requirement** – mit app inventor, dashboard (application for your project using mit app, design the model and test the app)

**User story** : USN – 3

**Step-1** : In this step , User has to create a username and password for sign up . The username is Person and the password is 22555.

**Step-2** : After Sign up , User has to login using the same username and password. If the username and password is right it goes to next page . If the username and password is wrong it shows wrong username and password.

**Step-3:** After login , it shows “Welcome to Smart Waste Management System”. And it has a Continue tab.

**Step-4:** Next it opens Bin\_details screen which shows garbage level and garbage weight . According to this value the garbage is monitored regularly. If the user want to see the bin location it has a bin location tab
